

# SURE-SCOPE<sup>®</sup>

Single-Use Laryngoscope with Built-In Light Source

*Ultra-bright and  
reliable light source  
GUARANTEED!*

OBP Medical's SURE-SCOPE is a single-use one piece laryngoscope with a built-in LED light source. This ready-to-use device eliminates the time and expense of reprocessing and reduces the risk of cross-contamination in the medical setting by obsoleting reusable light sources, handles, and blades.

SURE-SCOPE is made of a revolutionary reinforced nylon compound, offering exceptional strength and rigidity. Each SURE-SCOPE blade is validated to support over 40lbs of blade force, 4 times higher than intubation requirements.

# Impress JCAHO with SURE-SCOPE

## Reduce risk of cross-contamination w/ SURE-SCOPE:

Despite the use of single-use blades, reusable laryngoscope handles provide a potential route for cross-contamination of pathogens from patient to patient. A 2009 study published in the *Anesthesia & Analgesia* found 75% of laryngoscope handles tested were positive for bacteria. Even following mandates for cleaning and disinfection leaves pathogens that can transfer from one patient to the next. SURE-SCOPE's unique and innovative single-use design eliminates risk of cross-contamination from reusable parts and components.

## An affordable and reliable single-use laryngoscope:

A 2012 report from the Healthcare Cost and Utilization Project lists intubation as a concern for escalating medical costs. The average cost of a reusable laryngoscope is \$27.40/ intubation, according to a study conducted by Southeast Health. The entire SURE-SCOPE device is single-use; the facility incurs no additional reprocessing expenses. Medical facilities can cut their cost per intubation to under \$10 dollars.

- Item # MAC 2: C090120
- Item # MAC 3: C090130
- Item # MAC 4: C090140
- Item # MILLER 00: C090205
- Item # MILLER 0: C090200
- Item # MILLER 1: C090210
- Item # MILLER 2: C090220
- Item # MILLER 3: C090230
- Batteries included in each unit
- Each unit comes packed sterile

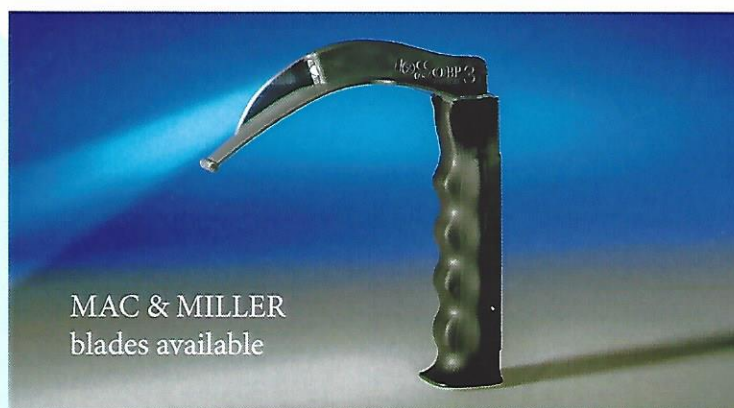

U.S. Patent # D745,669

Patent Pending

REV 09202016

## Product Features:

- Entirely single-use device eliminates the risk of cross-contamination
- Comes ready for use with a built-in ultra-bright LED light source, no assembly required and no additional parts needed
- Wider handle with added grip (NEW)
- Revolutionary reinforced nylon material provides exceptional strength and rigidity
- One piece construction ensures blade integrity and eliminated risk of corrosion
- Adult blades now feature an on/off switch (NEW)
- Tapered LED housing on adult blades for improved visibility (NEW)

MAC & MILLER  
blades available

## About Us:

OBP Medical is a leading global developer of single-use, self-contained, illuminating medical devices. Our single-use lights are amongst the brightest on the market, allowing for optimal visualization during procedures. Our innovative products are used in physician offices, surgery centers and more than 3,500 hospitals throughout the U.S., as well as healthcare facilities worldwide.
